

## 6<sup>th</sup> Grade Science Work for December 7-11, 2020

This will be the last week for the Geology and Fossils units. It will be a bit of an unusual week because on Monday and Tuesday, we will have Science MAP testing. This test will help us determine how students are doing with their science knowledge in general, this is specially important because of the circumstances of the end of the last school year. On Wednesday, when we go back to our regular class, we will go over review material for the units and then take a quiz on Thursday. On Friday, we will begin our new unit, Evolutionary Relationships!

### What you need to know:

#### ☐ Vocabulary

- **Anatomy** – The study of the structures of organisms and their parts.
- **Common Ancestry** – When organisms are descended from a single ancestor.
- **Evolutionary History** – The sequence of heritable changes that occurred among species since the origin of life on Earth.
- **Evolve** – To change the frequencies of alleles in a population over time.

**This week, students are expected to complete the following assignments:**

#### Microsoft Teams:

- ☐ Science MAP Testing (Monday and Tuesday)
- ☐ Geological History of Earth/Fossil Kahoot (Wednesday)
- ☐ Geological History of Earth/Fossil Record Quiz (Thursday, will be made available that morning)
- ☐ How does evolution work? (Friday)

#### Nearpod:

- ☐ Wednesday Warm-Up
  - CODE: **M6UG9**
- ☐ Friday Warm-Up
  - CODE: **XKCG6**

**Science Quote of the Week:** "It is not the strongest of the species that survives, nor the most intelligent, but the one most responsive to change." -Charles Darwin
